To,
The Airline Duty Manager

Subject: Declaration for Carriage of Electric Wheelchair with Non-Spillable Batteries (UN2800)

Dear Sir/Madam,

This is to certify that the electric wheelchair Model: AASRAA POWER AIR1 ARC01B, being carried by the passenger, is equipped with sealed, non-spillable batteries that are compliant with applicable air transport safety regulations.

Battery Details

- Type: Lithium-Ion Battery
- Classification: Lithium-Ion Rechargeable Battery
- UN Number: UN3481
- Configuration: 1 detachable battery installed in wheelchair
- Rating: 24V, 10Ah (240 Wh per battery)

Regulatory Compliance

The installed batteries:

- Meet the requirements of lithium-ion batteries as per UN transport regulations
- Have passed all the UN38.3 testing requirements
- Are permitted under IATA Dangerous Goods Regulations for mobility aids under Special Provision A67
- Are not subject to IMDG / ADR / RID regulations under Special Provision 238

Safety & Installation

- Batteries are securely installed within the wheelchair in sealed housings and can be detached when required.
- The design ensures no free liquid electrolyte and no risk of spillage under normal transport conditions
- Electrical systems are protected against short circuit and accidental activation

Handling Recommendation

- The wheelchair is safe for transport with batteries installed
- Battery removal may be required as the battery is detachable.
- The wheelchair should be:
    - Switched OFF
    - Protected from accidental activation
    - Handled carefully to avoid damage

Declaration

We confirm that the above-mentioned wheelchair and its batteries comply with applicable international air transport safety standards and are safe for carriage.

Relevant supporting documents (Battery Specification Sheet and MSDS) are attached for your reference.

We request you to kindly facilitate acceptance and handling of this mobility aid in accordance with applicable guidelines.
